ORBITA TECH

KINGDOM OF SAUDI ARABIA · SINCE 2023

Company Profile.

End-to-end value-added system integrator for IT infrastructure, networking, cybersecurity and smart building technology.

IT INFRASTRUCTURE · NETWORKING · CYBERSECURITY · COLLABORATION · MANAGED SERVICES

www.orbitatechs.com

WHO WE ARE

About us.

Founded in 2023 and based in the Kingdom of Saudi Arabia, Orbita Tech is an end-to-end value-added system integrator delivering business technology and smart building solutions.

We combine IT infrastructure, networking, cybersecurity, passive infrastructure, unified communications and smart building platforms to create connected, secure, efficient and user-focused environments.

Our role extends beyond product supply. We support projects from design and technical coordination through supply, installation, programming, integration, testing, commissioning, training and final handover.

We also provide highly skilled professionals on site and 24/7 infrastructure and application support through our off-site technical team — becoming a seamless part of our clients' own IT operations.

Established in the Kingdom of Saudi Arabia	Core solution practices & business units	Global technology partners	Infrastructure & application support

WHAT WE DO

Company activities.

Orbita Tech brings accumulated experience across a broad spectrum of infrastructure and integration solutions. Whether an organization is large, medium-sized or small — centralized in one building or spread across many sites — we provide complete, intelligent solutions for its computing and communication needs, and localized solutions for its specific requirements.

In today's fast-moving business environment, success depends on delivering your vision efficiently. We take responsibility for robust solutions in network and server infrastructure, unified communication, security and smart building technology.

Establishing a robust base for your enterprise.

We work alongside our clients' internal teams to guide them through every stage — so each project is delivered with consistent, high quality service.

01

Assessment

Understanding the site, current systems and business needs.

02

Planning

Designing the right architecture, scope and roadmap.

03

Implementation

Supply, installation, integration and commissioning.

04

Operation support

Maintenance and support that keep systems performing.

Skilled professionals on site

We provide highly skilled professionals to support and manage clients' IT — data centers, desktop support, server farms and network communication systems — becoming a seamless part of their team.

24/7 off-site support

Our off-site technical support team delivers around-the-clock infrastructure and application support, so issues are handled quickly whenever they occur.

OUR VISION

To be a trusted Saudi technology integration partner, enabling connected, secure, intelligent and energy-efficient buildings and enterprises.

OUR MISSION

To translate customer and project requirements into practical, interoperable technology solutions — and deliver them from design support through installation, integration, testing, commissioning and handover.

Our values.

The principles behind every project we deliver.

01 People

We support and respect each other and communicate openly. Customers, suppliers and stakeholders are part of our team.

02 Commitment & accountability

We achieve results through continuous improvement, teamwork and honouring every commitment we make.

03 Customer care

We listen, understand and serve — applying our knowledge to help customers achieve their goals.

04 Quality

Each of us is responsible for quality in everything we do. By delivering quality, we invest in our future.

05 Sustainability

We respect our environment and know that what we build today creates the future — so we build our business on sustainable practices.

ONE INTEGRATED TECHNOLOGY PORTFOLIO

Integrated tech for smarter buildings.

Orbita Tech brings multiple technology disciplines together within one coordinated project delivery model. Each discipline can be delivered on its own or integrated through a coordinated architecture — reducing interface gaps and creating one connected operating environment for the digital infrastructure, building systems, users and facility operations.

A ICT infrastructure & network solutions

B ELV & security systems

C AV & meeting room technologies

D Smart solutions — KNX, BMS & GRMS

INFRASTRUCTURE · DATA CENTER · NETWORKING · SECURITY · LOW CURRENT · AI & IOT

WHAT WE DO

Our core solutions & technology partners.

Eight integrated practices, each delivered with leading global vendors — independently or as one coordinated architecture.

01 IT Infrastructure & Data Center

Servers, storage & virtualization, data center infrastructure, racks and aisle containment.

HPE · CISCO · HUAWEI · DELL · +6

02 Networking

Core, distribution & access switching, routing, wireless, network management and LAN/WAN.

CISCO · HPE · ARUBA · HUAWEI · +2

03 Security & Cybersecurity

Network security & firewalls, endpoint & cloud security, CCTV, access control & biometrics.

FORTINET · PALO ALTO · HIKVISION · +13

04 Passive Infrastructure

Structured cabling, copper & fiber, MPO/MTP high-density solutions, testing & certification.

COMMSCOPE · PANDUIT · CORNING · +5

05 Unified Communication & Collaboration

IP telephony & PBX, video & voice conferencing, commercial displays & digital signage.

CISCO · AVAYA · YEALINK · YEASTAR · +6

06 Managed Services & AMC

Infrastructure, network & security support, preventive & corrective maintenance, renewals.

CISCO · HPE · DELL · MICROSOFT · +2

07 Backup Solutions

Backup software, appliances & NAS repositories, replication and disaster recovery.

VEEAM · VMWARE · MICROSOFT · +7

08 Smart Solutions Business Unit

KNX & Zigbee control, BMS, GRMS, energy management and smart building integration.

HONEYWELL · SCHNEIDER · ABB · EELECTRON · +4

CORE SOLUTION 01

01 IT Infrastructure & Data Center

We design, supply and implement the compute, storage and physical data center foundations that keep business-critical applications running — scalable, resilient and ready for growth.

WHAT WE DELIVER

Servers, Storage & Virtualization

Rack, tower and hyperconverged platforms with enterprise storage and virtualization.

Data Center Infrastructure

Server rooms and data centers built for availability, density and efficient operation.

Racks, Enclosures & Aisle Containment

Cabinets, enclosures and hot/cold aisle containment for clean airflow and cabling.

Design, Supply & Implementation

Infrastructure design, supply, installation and configuration through to handover.

TECHNOLOGY PARTNERS

HPE · Cisco · Huawei · Dell · Lenovo · Nutanix · Veeam · APC by Schneider Electric · Eaton · riello elettronica

Data centers & critical infrastructure.

The data center houses the critical systems that modern organizations depend on every day — and is one of their largest technology investments. We design and build server rooms and data centers with the density, resilience and cable management they need to grow.

To protect that investment, we offer different levels of maintenance and support for servers, storage and data center infrastructure, aligned to each customer's business needs — from preventive checks to fully managed support.

Servers & storage

Rack servers, SAN/NAS storage and hyperconverged platforms.

Racks & aisle containment

Cabinets and hot/cold aisle containment for efficient cooling.

Power & UPS

Uninterruptible power and distribution for critical loads.

LC cable assemblies

Factory-terminated LC fiber patching for high-density racks.

Pre-terminated MPO/MTP trunks

Plug-and-play trunks for rapid, zero-downtime deployment.

Ultra-high-density panels

UHD panels and fiber raceway systems that save rack space.

Consolidation, cost efficiency, rapid deployment

Fiber and copper structured cabling that paves the way for tomorrow's data center.

CORE SOLUTION 02

02 Networking

We build fast, secure and manageable wired and wireless networks — from the campus core to the branch edge — engineered for availability, visibility and future expansion.

WHAT WE DELIVER

Core, Distribution & Access Switching

Layered switching architectures for campus, data center and branch networks.

Routing & Wireless Solutions

Enterprise routing, Wi-Fi access points, controllers and wireless gateways.

Network Management

Monitoring, configuration and fault management for consistent performance.

LAN / WAN Infrastructure

Reliable connectivity across buildings, sites and remote locations.

TECHNOLOGY PARTNERS

Cisco · HPE · HPE Aruba Networking · Fortinet · Huawei · Ruijie

Networking & wireless solutions.

We develop next-generation data networks with high capacity and ultra-low latency, and deliver state-of-the-art infrastructure across private, public and data center environments.

Network maintenance is both preventive and corrective. When failures occur, the cost is not only financial but lost productivity — so our support streamlines operations and keeps the business running.

Wireless access points

Indoor and outdoor Wi-Fi with seamless roaming.

Wireless gateways

Controllers and gateways for secure wireless access.

Network switches

Core, distribution and PoE access switching.

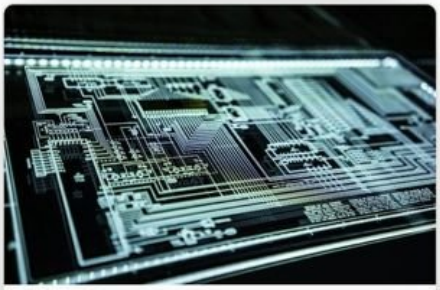

Data center switches

High-speed, low-latency fabric for server farms.

Cloud-managed switches

Central cloud visibility and control across sites.

Security gateways

Secure routing, SD-WAN and VPN at the edge.

An integrated, automated approach to network operations

- Optimized fault management and availability
- Change and configuration management for compliance
- Unified fault and performance management
- Automation of routine IT processes

CORE SOLUTION 03

03 Security & Cybersecurity

We protect people, property, data and networks — combining cyber defence with physical security so threats are prevented, detected and controlled across the whole environment.

WHAT WE DELIVER

Network Security & Firewalls

Next-generation firewalls, secure gateways, VPN and application delivery.

Endpoint & Cloud Security

Protection for users, devices, servers and cloud workloads against advanced threats.

CCTV & Surveillance

IP cameras, video management and recording with secure remote viewing.

Access Control & Biometrics

Card and biometric readers, controllers, turnstiles and time attendance.

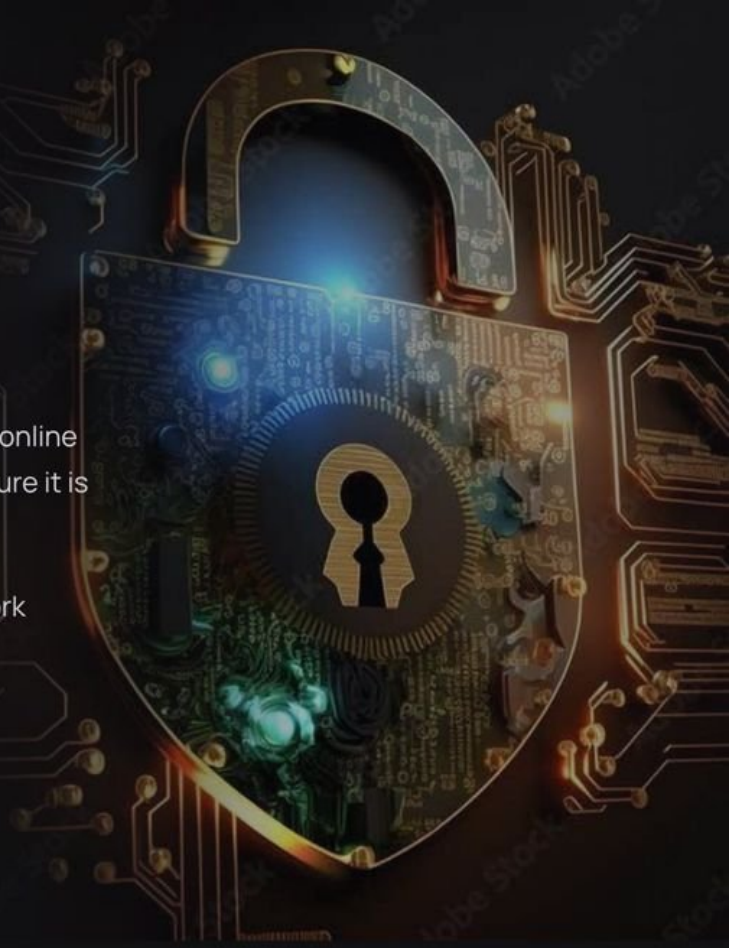

TECHNOLOGY PARTNERS

FORTINET · paloalto NETWORKS · SOPHOS · f5 · TREND MICRO · CISCO

Honeywell · ZKTeco · HIKVISION · alhua TECHNOLOGY · Hanwha Vision · BOSCH

suprema · kaspersky · CROWDSTRIKE · Bitdefender

Cybersecurity services.

As organizations rely more on technology, every aspect of online data must be protected — and one of the best ways to secure it is to protect the network itself.

Orbita Tech delivers trusted enterprise security and network acceleration solutions, from architecture and testing to continuously managed protection.

Security solutions

- Enterprise security architecture
- Cloud security
- Advanced threat prevention
- Internet of Things security
- Identity theft protection

Attack & penetration testing

- Applied research
- Cyber threat intelligence
- Application security
- Vulnerability management
- Malware remediation
- Platform management
- Data security
- Endpoint security

Managed security services

- Security intelligence
- Vulnerability management
- Malware remediation
- Platform management
- Endpoint management

Protection against danger, damage, loss and criminal activity

We help customers protect people, property and assets while optimizing processes to improve business efficiency.

Surveillance & access control.

CCTV surveillance systems

In a closed-circuit television system, every element — cameras, display monitors and recording devices — is directly connected, so video stays private and secure. We design advanced video management (VMS) and surveillance hardware for sites of every size.

Authorized users can view live and recorded images remotely over the network, helping protect people, property and assets around the clock.

IP cameras · NVR / VMS · Video walls · Remote viewing

Access control & identity management

Physical access control is a matter of who, where and when. We design and implement solutions from multiple vendors — from standalone card readers to networked systems with biometric readers, door controllers, turnstiles, road blockers and sensors.

Every organization operates differently, so each design follows its own needs. Time and attendance systems give employers full control of working hours, reduce over-payments and eliminate manual processes.

Biometric readers · Turnstiles · Road blockers · Time attendance

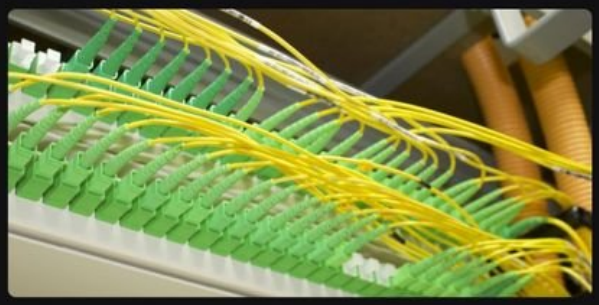

TECHNOLOGY PARTNERS

Honeywell · ZKTeco · Cisco · Hikvision · Dahua · Hanwha Vision · Bosch · Suprema

CORE SOLUTION 04

04 Passive Infrastructure

The physical layer every system depends on. We deliver certified copper and fiber cabling systems — from backbone to desk and inside the data center — built for higher speeds, density and long service life.

WHAT WE DELIVER

- **Structured Cabling**
  Standards-based horizontal and backbone cabling systems.
- **Copper & Fiber Optic**
  Cat6/6A copper and single-mode / multimode fiber links.
- **Fiber Patch Panels**
  Patch panels, enclosures, pigtails and accessories.
- **Racks & Cable Management**
  Racks, trays and managers for tidy, serviceable rooms.
- **MPO/MTP High-Density**
  Pre-terminated trunks and ultra-high-density fiber.
- **Testing & Certification**
  Link testing and certification reports at handover.

TECHNOLOGY PARTNERS

COMMSCOPE · PANDUIT · CORNING · legrand · R&M · BELDEN · LS Cable & System · MASAR

ICT infrastructure & structured cabling.

We support commercial and residential networks across the Kingdom with a wide selection of high-performance passive products — readying infrastructure for higher speed, better scalability and lower total cost for enterprises, multi-tenant buildings, service providers and data centers.

Fiber optic cable forms the backbone between equipment rooms and telecom closets, and for campus, MAN, LAN and WAN links. Copper Cat6/Cat6A cabling serves horizontal runs of up to 90 m to every outlet.

Fiber systems

Single-mode and multimode backbone and patching.

Copper systems

Cat6 / Cat6A channels, jacks and patch cords.

Cable management

Horizontal and vertical managers, trays and labelling.

Cables

Indoor, outdoor and armoured copper and fiber cables.

Racks & enclosures

Floor-standing and wall-mount cabinets and frames.

Tests & tools

Certification testing, OTDR and termination tools.

Higher speed
Ready for 10G, 40G and beyond.

Better scalability
Modular systems that grow with you.

Lower total cost
Certified quality and long service life.

CORE SOLUTION 05

05 Unified Communication & Collaboration

We connect people wherever they work — with IP telephony, conferencing and visual communication that make meetings, customer contact and day-to-day collaboration simple and reliable.

WHAT WE DELIVER

- **IP Telephony & PBX**
  IP-PBX platforms, SIP trunking, IP phones and contact center features.
- **Video & Voice Conferencing**
  Meeting room systems and audio conferencing for every room size.
- **Collaboration Solutions**
  Unified messaging, presence and team collaboration across devices.
- **Commercial Displays & Signage**
  Professional displays, video walls and managed digital signage.

TECHNOLOGY PARTNERS

Cisco · Avaya · Alcatel·Lucent · Panasonic · Grandstream · Yealink · Yeastar · Zycoo · TOA · Bose

IP telephony & PBX systems.

PBX & IP-PBX

A private branch exchange (PBX) serves an organization's internal telephone network — concentrating central-office lines and trunks and connecting a large number of extensions. An IP-PBX carries voice over the Internet Protocol, bringing the benefits of computer telephony integration (CTI).

We specialize in the supply and installation of multi-vendor PBX and IP telephony systems.

Telecommunications & networking services

We take responsibility for the design, infrastructure, maintenance and support of voice networks, telephone services, software and hardware — from a single office to multi-site enterprises.

For hospitality, we deliver value-oriented VoIP calling for lobbies, guest rooms, elevator bays and conference centers.

IP phones & consoles

Desk and wall-mounted deployments.

SIP trunking

Lower call costs and flexible lines.

Co-branding

Hotel phones with your brand plate.

Low power

IEEE Class 1 PoE, earth-friendly devices.

TECHNOLOGY PARTNERS

Alcatel·Lucent · Panasonic · AVAYA · GRANDSTREAM · CISCO · Yealink · Yeastar · ZYCOO

05 · COLLABORATION

AV & meeting room technologies.

Our audio-visual solutions serve education, retail, restaurants and quick-service outlets (digital menus), offices and meeting rooms. It is a complete package — from in-depth consultation to understand your needs, to installation, technical guidance and maintenance — so every AV requirement is taken care of.

Commercial display screens

Digital signage, commercial TVs, meeting-room presentation, customer advertising and data walls — with the right size, format, warranty and mounting for each space.

Video conferencing & collaboration

Two-way video and audio that brings people together across locations — reducing travel, cost and carbon emissions for business, education and healthcare.

Digital signage

Deliver messages on any screen format — from internal communication to customer-targeted content — with software, screens, content management and support.

CATV & IPTV

Turnkey, centralized satellite CATV and IPTV systems over coax, fiber or LAN — built with equipment from industry-leading manufacturers.

Education · Retail · Restaurants & digital menus · Corporate offices · Meeting rooms · Hospitality

CORE SOLUTION 06

06 Managed Services & AMC

Annual Maintenance Contracts and managed support that keep infrastructure, networks and security performing at their best — with regular check-ups, fast response and a single accountable team.

WHAT WE DELIVER

IT Infrastructure Support
Servers, storage and virtualization kept healthy and up to date.

Network & Security Support
Monitoring, tuning and incident response for networks and firewalls.

Preventive & Corrective Maintenance
Scheduled health checks plus fast fault resolution under SLA.

Installation, Commissioning & Support
Hands-on installation, commissioning and ongoing technical support.

Software & License Renewal
Tracking and renewal of software subscriptions, support contracts and security licenses so nothing lapses.

TECHNOLOGY PARTNERS

Cisco · HPE · Dell · Microsoft · Sophos · Palo Alto Networks

06 · MANAGED SERVICES & AMC

Maintenance & technical support.

Our Annual Maintenance Contracts (AMC) keep customers' products in proper working condition. Each AMC defines regular check-ups and routine work so performance and quality are maintained throughout the system's life.

Services include technical support and the renewal of software, licenses and anti-virus subscriptions. Our technical services team is a strong arm for practical support — covering installation, commissioning, maintenance and customer training.

- **Preventive maintenance** — scheduled inspections, health checks and updates.
- **Corrective maintenance** — fast troubleshooting and fault resolution.
- **Training** — knowledge transfer for customer IT teams.

ENGAGEMENT OPTIONS

AMC

Annual maintenance contracts

Planned visits and support for infrastructure, network and security systems.

On-site

Resident professionals

Skilled engineers placed with your team for data center, desktop and network support.

24/7

Off-site support

Around-the-clock infrastructure and application support from our technical team.

CORE SOLUTION 07

07 Backup Solutions

Backup Software Solutions

Enterprise backup, recovery, replication and data protection for physical, virtual and cloud environments.

Backup Hardware & Appliances

Dedicated backup appliances, NAS-based backup, storage repositories and scalable backup infrastructure.

TECHNOLOGY PARTNERS

Veeam — backup, recovery, replication and data protection for virtual, physical and cloud environments.

VMware — virtualization infrastructure, VM backup and recovery, VM replication and disaster recovery.

Microsoft — backup and data protection for Microsoft environments, including virtual and cloud workloads.

QNAP — NAS-based backup storage, centralized repositories, snapshots, replication and data protection.

Synology — NAS-based backup and storage, centralized backup, snapshots, replication and disaster recovery support.

HPE & Dell — enterprise backup infrastructure, storage platforms and purpose-built backup appliances.

Lenovo, Huawei & H3C — enterprise storage, backup servers and data-protection appliances for on-premise and hybrid environments.

CORE SOLUTION 08 · BUSINESS UNIT

08 Smart Solutions Business Unit

Connected, intelligent and energy-efficient building environments

Our Smart Solutions Business Unit delivers integrated automation, building control and energy-management solutions for residential, hospitality, commercial and mixed-use developments — extending our ICT, ELV and AV capabilities into one connected smart building environment.

FIELDS OF BUSINESS

Smart lighting control

Wired KNX and wireless Zigbee for lighting, scenes, sensors, shading and room functions.

Building management

Central monitoring and control of mechanical and electrical building systems.

Guest room management

Integrated guest-room control that enhances comfort and hotel efficiency.

Energy management

Metering, dashboards, analytics and control strategies that improve performance.

Smart building integration

Coordinated integration of BMS, lighting, GRMS, energy, ICT, ELV and third-party platforms.

Lifecycle services

Design support, programming, commissioning, training, maintenance and optimization.

One coordinated technology architecture

Connecting building systems, users and facility operations.

AUTOMATION · CONTROLS · ENERGY
ICT · ELV · AV

Smart control systems.

KNX, Zigbee, BMS and GRMS solutions

Smart lighting control — KNX

ROBUST · WIRED · INTEROPERABLE

KNX is the open standard for robust, wired and interoperable building control. We apply KNX to integrate lighting, scenes, sensors, shading, room functions and selected HVAC interfaces within one coordinated control platform.

- Suits commercial buildings, hospitality, premium residential and large projects
- Centralized and decentralized control architectures
- Multi-vendor interoperability and long-term expansion
- Scene control, scheduling, occupancy and daylight response

Wireless smart solutions — Zigbee

FLEXIBLE · SCALABLE · RETROFIT-READY

Wireless Zigbee is a flexible alternative for smart lighting, sensors, switches, HVAC control and smart-home functions — ideal where reduced cabling, retrofit and rapid deployment matter.

- Villas, apartments, compounds, retrofit and light-commercial
- Wireless switches, dimmers, relays, sensors and thermostats
- Phased implementation and future expansion
- Mobile apps and approved smart-home platforms

Building management & guest room systems.

Centralized building intelligence that supports comfort, operational response and hospitality efficiency.

Building Management Systems

BMS · VISIBILITY & CONTROL

Our BMS solutions provide centralized monitoring, alarms, scheduling, trending and control of mechanical and electrical systems. A properly designed BMS improves operational visibility, supports faster facility response and creates a foundation for performance optimization.

- HVAC monitoring and control
- Electrical system and equipment status
- Alarm management, schedules, trends and dashboards
- Integration with meters, lighting control and other approved systems

Guest Room Management

GRMS · COMFORT & HOTEL EFFICIENCY

GRMS integrates guest-room functions into one coordinated control environment — improving guest comfort, simplifying room operation and giving hotel teams useful room-status and energy information.

- Lighting scenes and master controls
- Temperature and fan-coil control
- Curtain and blind control
- Door status, privacy and housekeeping interfaces
- Integration with hotel operational platforms

Smart Solutions connect building systems, users and facility operations through one coordinated technology architecture.

08 · SMART SOLUTIONS

Energy management.

Turning building data into operational and lifecycle value

Energy management helps owners and operators understand how energy is consumed and where performance can improve. We combine metering, data collection, dashboards, analytics and control strategies to support informed operational decisions.

- Electrical and utility metering integration
- Consumption dashboards and performance indicators
- Historical trends, alarms and exception reporting
- Scheduling, occupancy control and demand reduction
- Integration with BMS, lighting and facility workflows

INTEGRATION

Smart building integration.

A smart building is created when individual systems exchange relevant information and work in coordination. We develop integration architectures that connect building control, energy, ICT, ELV and user-facing technologies through approved interfaces, gateways and protocols.

SYSTEMS INTEGRATION

BMS, smart lighting, GRMS, energy metering, ICT, ELV and selected third-party platforms.

OPERATIONAL VISIBILITY

Central dashboards, alarms, trends and actionable information for operators and facility teams.

ENHANCED EXPERIENCE

Intuitive control, automated scenes, comfort settings and responsive building services.

LIFECYCLE PERFORMANCE

Maintainable designs, documented interfaces and scalable architecture for future development.

Connected systems. Actionable data. Lasting value.

Delivery, applications & ecosystem.

END-TO-END DELIVERY SCOPE

- Requirement analysis and solution consultation
- Design coordination, architecture and value engineering
- Technical submittals, shop drawings and approvals
- Supply, installation, programming and integration
- Testing, commissioning and performance verification
- Training, as-built documentation and handover
- Warranty, preventive maintenance and lifecycle support

TYPICAL APPLICATIONS

- Hotels and serviced apartments
- Commercial offices
- Mixed-use developments
- Residential compounds and premium villas
- Healthcare and education facilities
- Retrofit and energy-performance projects

SMART SOLUTIONS PARTNERS & TECHNOLOGY ECOSYSTEM

Our Smart Solutions portfolio is supported by established manufacturers, smart-home platforms and open connectivity standards, selected according to project requirements.

MOES · tuya

CONNECTIVITY STANDARDS

KNX · Zigbee · Matter

Project-led technology selection, integration and lifecycle support.

HOW WE DELIVER

End-to-end project delivery.

We are a value-added system integrator, not only a product supplier. One accountable team covers the complete project lifecycle.

01
Requirement analysis & technical consultation

02
System design, architecture & value engineering

03
Technical submittals, shop drawings & material approvals

04
Supply, logistics & procurement coordination

05
Installation, configuration & programming

06
System integration & third-party interfaces

07
Testing, commissioning & performance verification

08
Training, as-built documentation & final handover

09
Warranty, preventive maintenance & technical support

SUPPLY PORTFOLIO

Some of our major products.

Beyond integration, we supply genuine, warrantied products from our technology partners — from end-user devices to infrastructure and building systems.

01 Desktops, monitors & PCs	02 Servers & storage	03 Laptops & POS machines
04 Switches & routers	05 Printers & scanners	06 Network cabinets & industrial PCs
07 UTP & fiber optic cable	08 CCTV surveillance	09 IP telephones
10 Fingerprint access control	11 Public address systems	12 Accessories
13 Building management systems (BMS)	14 Guest room management (GRMS)	15 Smart lighting control (KNX)

TECHNOLOGY ECOSYSTEM

Our technology partners.

We work with leading global manufacturers to deliver reliable, scalable and supported solutions — selecting the right technology for each project's requirements.
